

Simple, Flexible, Cloud Preservation Storage

- **Open Source, hosted, secure**
Easy-to-use tools combined with cloud storage from expert providers.
- **Bit integrity health reports**
via fixity checks on all content at least twice per year.
- **Flexibility**
Mix and match, private storage, public access, and TRAC-certified dark archives with automatic replication and local storage syncing.
- **Integrations**
A full REST API plus easy integrations with DSpace, Fedora, Archivematica, and Archive-It.

Service Providers

<http://duracloud.org>

DuraCloud from DuraSpace offers one-click preservation backup to one or more expert cloud storage providers, including Amazon S3 and automatic replication to Amazon Glacier or to Chronopolis, a TRAC-certified, geographically distributed academic dark archive. Special pricing is available for subscriptions of 20+ TB. Learn more about our subscription options or request a quote at duraspace.org/duracloud.

 **DURASPACE**™

<http://duracloud europe.org>

Provided by 4Science, the first service provider in the DuraSpace Certified DuraCloud Partner Program. DuraCloud Europe uses DuraCloud technology to facilitate preservation and content storage services in Europe, complying with the European Commission General Data Protection Regulation (GDPR). The service provides affordable, transparent, vendor-independent, and cost-predictable access to the cloud storage facilities in Europe. Contact us to learn more or visit duracloud europe.org.
